Fruitland Mq Fire - Draft UC Cover Letter EPA review.docx
ATT00002.htm

I did not hear back about the rescheduling of this call, however, I would really appreciate review and any comments on the attached documents so that these can be finalized and the packages can be put together. My resources were set aside this week to do this, but are now be diverted while awaiting the final documents. Please review and provide comments and/or concurrence ASAP.

Thank you,

Michelle Rogow
On Scene Coordinator
USEPA Region 9

Charlene and Tony,

I am thrilled to be able to present you with the draft final cover letter and fact sheet for the residential package. This has been through our technical and public information review.

Please review and edit in track changes, so that we can finalize this. Hopefully it meets our (and the residents) needs. Please let me know if there is anything missing or that we need to work on. We now have the ServPro reports and are ready to put the packages together.

These two documents will need to be translated, but at Charlene's suggestion, we will use the ATSDR ToxFAQs for the metals information.

Hopefully you can review and we can discuss on our weekly call.

Regards,

Michelle
